Information ICS2 2026

What is ICS2?

ICS2 is a IT system developed to collect data on all goods entering the EU before they arrive. Economic operators must submit safety and security information to ICS2 through an Entry Summary Declaration (ENS).

The purpose of the system is to strengthen the protection of the EU's internal market and its citizens through new customs-related security measures. At the same time, it aims to facilitate free trade through improved, data-driven security processes that reflect today's global business models.

ICS2 Fee (Imports into the EU)

Fees:

- For all shipments where NTEX provides both the Export and ICS2 declaration, the charge will be £35.

- For customers using another agent for the Export declaration, the charge for the ICS2 declaration alone will be £20.
